(which are referred to in the multiple places of pedigree chart) and they have the sire-crop relationship, e.g. between Northern Dancer and Nureyev, or if the same name is referred to in not less than three places of the chart. However, the decoding as the above is requisite if you precisely examine the thoroughbred's mating in light of genetics.

Repeatedly, neither "SxS" nor "DxD" is the inbreeding and thus, any scientific effect will not come out of it. Regardless of it, there are a lot of publications and websites carrying such reference as without any distinction between S and D, so that there are still a lot of horsepersons and fans misunderstanding that Lucky Lilac has enjoyed the inbreeding effects of both Northern Taste and Mr. Prospector.

Persons whose parents are cousins have the 3x3 incross. If any of them marries to someone, will their kids have any genetic effects and risks out of the 4x4 incross? That can't be!!

To put it in extreme terms, if there is a person born out of an illicit relationship, e.g. real parent-child or siblings, and if he or she marries to someone without any blood relationship, the level of genetic risks
